

Process Safety Management for Site Champions

Course duration - 3 days

About the Course

This course has been designed to give delegates a detailed understanding of effective process safety / major accident hazard risk management and the positive role that they can play within this.

It will deliver a clear insight into building and maintaining a positive safety culture by generating effective employee engagement and motivating the workforce, including how to identify and manage risk to the appropriate levels whilst enhancing operational effectiveness and business continuity.

Delegates will be guided on the measurement of the implementation, the effectiveness and the quality of a Process Safety Management System against their own standards, and taking into consideration external inspection requirements.

Why is Process Safety Important?

Incidents can kill and injure many people

Bhopal

Incidents can cause massive pollution

Deep Water Horizon

Incidents can cause major economic disruption

Buncefield

These incidents can severely damage a company's reputation. They can have major financial impacts and companies can be "paralysed" in the aftermath. Companies and individuals can also be prosecuted.

Who should Attend?

This course is particularly suitable for major accident hazard organisations, and those that must actively demonstrate the control of hazards to people, their local communities or the environment.

It is ideal for business leaders and managers who are responsible for leading process safety implementation, monitoring and review, and those individuals charged with raising capability, awareness of and commitment to process safety within their own area or throughout the organisation.

Why Choose Cogent Skills?

An award-winning training provider. Chemical Industries Association (CIA) service provider of the year with:

- 100% Cost transparency
- Very high success rate in NEBOSH exam passes
- EXCLUSIVE! Value added PSM content option
