

Course duration – 2 days

## Process Safety Management Foundations Blended Learning

### What is it?

A two-day training course covering the identification, evaluation and prevention of accidents and incidents, as a direct result of failures in equipment, processes and procedures.

All employees working in high hazard industries need to understand the safety, health and environmental hazards associated with their working environment.

The Process Safety Management Foundations course provides the fundamental knowledge and understanding of the principles of process safety management across the entire organisation.

### Who should attend?

The course is aimed at managers, supervisors, designers, safety personnel, and senior contract employees.

It is also suitable for young engineers and anyone who would like to develop a more detailed understanding of process safety management.

### How is it delivered?

The training will be delivered over 2 days through blended learning on a e-learning platform for groups of up to 12 delegates. For individuals or smaller groups we run open courses across the UK. All delegates are registered for an on-line self-assessment designed to reinforce their knowledge and understanding of process safety management and will be given exclusive access to a suite of video case studies designed to reinforce the learning for up to three years.

The course is delivered by highly experienced Cogent Assured Training Providers. A combination of presentations, case studies and discussions are used to illustrate interpretations of process safety management requirements and demonstrate ways to develop and monitor an effective process safety programme

This course can also be delivered via a face to face in-house or open course

*"A very effective and useful course. The trainers were fantastic, very patient and knowledgeable. Thank you for making it so interesting and the enthusiasm employed."*

Andrew Williamson, Indorama

### How do I get involved?

Call Cogent Skills today on **01325 740900** or email [industry@kogentskills.com](mailto:industry@kogentskills.com) to register your interest. We will work with you to agree a suitable time and Cogent Skills Assured Provider to deliver the course.

## What will I learn?

On completing the course participants will understand:

- The benefits and key principles of process safety management
- How to identify hazards and assess the risks associated with hazardous substances and plant
- The need for effective measures to limit the consequences of a major accident
- The importance of identifying suitable safety critical equipment, implementing key risk control systems and the importance of sustaining their effectiveness
- How to apply learning from near misses
- How to monitor performance to achieve continual improvement in process safety performance

## How much does it cost?

- **Blended Learning** £6300 +VAT  
For up to 12 delegates.
- **Open course** £800 +VAT  
Per delegate.

## The Benefits

The benefits of blended learning training are:

- Support – all the support needed to complete the courses is built into the programme in the one place, Cogent Learn
- Learning experience – it offers a highly interactive, two-way learning experience with immediate trainer feedback
- Cost savings - it can work around an organisations schedules meaning no travel and logistics are of concern
- Less time spent away from work - with training undertaken in virtual classroom environments, it can happen wherever access to the internet is provided
- Joint working - it can bring groups of people together from all locations
- Flexibility - Learning can take place at a time which suits the business

Process Safety Management Foundations course is part of the Process Safety industry training standards\*

*"The videos shocked me as to how easy it was to have an accident and made me aware of the importance of process safety. The course was very beneficial, I have gained a massive understanding."*

Daniel Arkle, Chemoxy

\* The training standards have been developed for industry by industry as a national framework for continuing professional development (CPD) in the process industries.
