for science industries

Course duration – 2 days

Workplace Competence Assessor

Are you able to assess whether your workforce is competent?

What is it?

The Workplace Competence Assessor (WCA) course will provide front line managers, supervisors and team leaders with the tools, techniques and skills to evaluate, develop and maintain the ongoing competence of their employees.

WCA is designed to upskill staff who need to assess competencies in the workplace, whether they are existing Competence Assessors or aspiring to be. Employees could be in a training role or work within the science industry and need training to be able to assess workplace competence effectively.

The course has been designed to enable delegates to assess competencies at all levels, rather than complete standard assessments measuring knowledge, giving organisations a clear and accurate picture of the competencies within their organisation. This is especially relevant in regulated environments.

Who should attend?

The course is aimed at front line managers, supervisors and team leaders including those who are existing Competence Assessors or aspiring to be.

It is also suitable for employees who are in a training role or work within the science industry and need training to be able to assess workplace competence.

How is it delivered?

The WCA course is made up into two days training plus two observations:

WCA Day 1: Principles and Practices of Assessment Six hours tuition and four hours private study.

WCA Day 2: Measuring Competence in the Workplace Approximately six hour's tuition plus 16 hours of private study looking at how competence can be measured in your workplace

Followed by two observation visits to that ensure the assessor is continuing to meet the standard.

Candidates will need to pass both units within a one year period to meet the requirements of the Competence Workplace Assessor training standard.

Regulatory need:

“Major hazard organisations require competent staff who have the necessary skills, knowledge and experience to undertake critical tasks in such a way as to prevent a major accident or minimise the consequences to people and the environment should one occur.”

COMAH Competent Authority, Inspection of Competence Management Systems at COMAH Establishments (Operational Delivery Guide)

How do I get involved?

Call Cogent Skills today on **01325 740900** or email industry@kogentskills.com to register your interest. We will work with you to agree a suitable time and Cogent Skills Assured Provider to deliver the course.
