

Process Safety Management System

Improving individual and organisational performance within high hazard industries

Cogent skills

for science industries

Consultancy Solutions

For regulatory compliance and workforce competence management

Why implement a PSM System?

A good Process Safety Management system can demonstrate your compliance to **major accident hazard site regulators** and keeps your sites safe and operating to full efficiency.

A comprehensive PSM System demonstrates that you:

- Know your **HAZARDS**
- Know your **PROCESSES** and **SYSTEMS**
- Have assurance that your **SYSTEMS** are working **EFFECTIVELY**

Benefits of implementing a good PSM system include:

- Compliance to COMAH / Seveso III regulatory requirements
- Demonstrate your safety systems
- **Environmental compliance - helps you to maintain your environmental license**
- Improved corporate reputation / advantage
- Improved operational and business efficiencies
- Improves operator effectiveness and asset management
- Improves personal safety and health
- **Reduced risk of a Major Accident To The Environment (MATTE)**
- Reduces the risk of accidental shutdowns / business loss
- **Keep your 'License to Operate'**

Regulatory Need

Major hazard organisations require competent staff who have the necessary skills, knowledge and experience to undertake critical tasks in such a way as to prevent a major accident or minimise the consequences to people and the environment should one occur.

COMAH Competent Authority,
Inspection of Competence Management Systems at
COMAH Establishments
(Operational Delivery Guide).

What is a Process Safety Management System

A PSM System is a set of organisational procedures designed to manage your risk, prevent major accidents, limit their consequences to people, the environment, and comply to COMAH regulatory systems requirements.

Process Safety Management System Consultancy (PSMS)

Our PSM System framework solution is based on the Process Safety Management industry **training standards** - recognised by the UK's Health and Safety Executive (H.S.E),

Cogent Skills is the custodian of these standards, which have been developed in consultation with major accident hazard industry body working groups and the [Process Safety Management Competence Programme Board](#) - which includes UK's H.S.E and industry employers

Cogent Skills' industry specialists will work with your senior leaders to review and improve your PSM system – to improve your safety and compliance culture, procedures and management

How we can help you with your Process Safety Management

We will help you to examine, review and improve your systems and evidence, facilitating you to manage your business effectively and in readiness should your business be subject to a regulator inspection.

We will give you the tools and knowledge to enable your organization comply to and align with, the Principles of Process Safety Leadership requirements, listed in the 2015 Competent Authority Delivery Guide (HSGL111).

["Understanding COMAH: The Performance and Recognition Framework"](#)

Framework services include:

1. **PSM Review**
2. **PSM Development** (see next page)
3. **PSM Courses** (see next page)

*"There are clear business benefits for managing process safety, failure to manage risks can cause harm to your people, your contractors, your visitors and your neighbours. To achieve successful management and control of safety and process safety, there must be leadership from the top. Don't allow your management team to sit in isolation. Ensure their competence, involvement and visibility
Good Safety = Good Business!"*

Chief Executive. UK Bulk Liquid Storage Provider
