

• **Laboratory Scientist Apprentice**

As a degree level Laboratory Scientist Apprentice, you will be involved in carrying out both routine and complex scientific experiments. You will perform a variety of technical support functions across the organisation that may directly impact the research and development of new products. This role allows you to work both individually and as part of a laboratory team while taking responsibility for the quality and accuracy of the work undertaken. You will get to be proactive in finding solutions to problems and identifying areas for improving the business.

How this Role Unlocks Your Potential

- You will be equipped to apply knowledge of underlying scientific principles in laboratory-based experimentation and contribute to the development of scientific technical projects.
- This role will help you understand the business environment, identify, and understand the requirements of internal or external customers and recommend the appropriate workflows, improvements, or scientific solutions.
- This role will prepare you to work autonomously to analyse, interpret and evaluate scientific data and present the results of laboratory work and problem solving clearly and concisely in written and oral form.

- You will develop your competencies and will be better at planning and prioritising tasks along with being able to communicate effectively with scientific and non-scientific audience.
- This role will allow you to demonstrate reliability, integrity, and respect for confidentiality on work related and personal matters, and understand the impact of work on others, especially were related to diversity and equality.
